

9/1/23

Exp 4 - Create a simple cloud software application for property buying and rental process using CSP to demonstrate SaaS

Step 1: Visit www.zoho.com

Step 2: Login and go to application and select creator

Step 3: Choose a template or create your own template

Step 4: Name the application as property buying and rental

Step 5: Insert fields into the app such as Name, property type, property value, area, date and time of registration etc.

Step 6: Run the app in live environment

Step 7: Enter the name, address and other values required

Step 8: You have successfully created an application for property buying and rental process.
